

Appl. No. PCT/CA2005/000102  
Prel Amdt. dated July 27, 2005.

8

### REMARKS

The claims of record in this application are those filed under Article 19 during prosecution of the international application. The foregoing amendments to these claims remove the multiple dependencies so as to reduce the filing fees. Claim 9 is an independent claim to an array receiver system, but referred to the receiver of claim 1. In order to avoid any confusion as to the claim count, the contents of claim 1 have been inserted into claim 9 and the reference to claim 1 removed.

In addition, this opportunity has been taken to remove the reference numerals from the claims and replace each of the terms "characterized by" and "characterized in that" by "comprising" or "wherein" as appropriate, in accordance with US practice.

No new subject matter has been added by these amendments.

Applicant reserves the right to introduce claims during examination to replace those effectively cancelled by the foregoing amendments to the claim dependencies.

Respectfully submitted,
